As the saying goes, a picture is worth a thousand words. The photo images shown below were captured from NASA satellite sources, they are truly alarming. These images provide shocking and undeniable proof of the ongoing global climate engineering/geoengineering/solar radiation management assault on our planet and its life support systems. Highly toxic heavy metals and chemicals (that are systematically sprayed into our atmosphere from jet aircraft as part of the geoengineering/SRM programs) are manipulated with extremely powerful radio frequency signals. These signals are transmitted from countless locations around the globe from various types of transmission platforms (ionosphere heater installations like HAARP, SBX radar, NEXRAD, etc.). The impact of the microwave transmissions on cloud formations is profound and highly visible ([square cloud formations are created under some scenarios](#)).

In the series of NASA satellite images below, many variances of radio frequency cloud impacts can be observed. The degree to which the ongoing climate engineering/climate/intervention/weather warfare is disrupting Earth's atmosphere and life support systems is [already beyond catastrophic](#) and happening all over the globe.

Hurricane suppression/manipulation is one aspect/agenda of the climate engineers. 85% of the hurricanes that impact the US originate from Africa. Low pressure systems migrate toward the west, off of

Africa's coast. A great deal of climate engineering/intervention takes place in this region, thus a number of the satellite images shown in this post were captured there. In the attempt to mask the climate intervention activity, the cyclone suppression occurring off the coast of Africa is officially blamed on "dust". Of course there is no acknowledgement of the ongoing climate engineering atrocities. The quote below is an [excerpt from a FOX news article](#).

Right now, much of the Gulf of Mexico and parts of the Caribbean have slightly warmer than normal ocean temperatures which would normally aid in tropical development. But there is so much dust and dry air in the atmosphere that storms are getting choked off before they even get started.

Though some may feel that cyclone suppression is beneficial, such interference with Earth's natural rhythms and systems has a long list of catastrophic downstream effects. Available data indicates that in other scenarios the climate engineers are actually augmenting and steering cyclones to serve their own agenda. ["Hurricane Matthew" may be an example of weather warfare on an unimaginable scale](#). Is hurricane Matthew being heavily manipulated and steered by the climate engineers? The evidence continues to stack up. Below is a satellite photo clearly showing atmospheric "waves" surrounding hurricane Matthew. [SpaceWeather.com](#) has labeled these as "gravity waves", but is that what these visible "waves" actually are? The satellite photos already shown in this post inarguably reveal heavy atmospheric manipulation from extremely powerful radio frequency/microwave transmissions and atmospheric aerosols. These transmissions leave a signature pattern on high level cloud formations that are saturated with electrically conductive heavy metal nanoparticles which are dispersed from jet aircraft as part of the ongoing climate engineering insanity.

Does the photo above really show "gravity waves" surrounding hurricane Matthew? Or does it show the signature pattern of extremely powerful radio frequency/microwave transmissions interacting with aircraft dispersed atmospheric aerosols? Both of these elements are a core part of climate and storm manipulation and steering. Photo: SpaceWeather.com

The global power structure long ago made the choice to subject our planet (and the entire web of life that it supports, including the human race) to an unimaginably massive and destructive climate intervention/weather warfare assault. This decision was made without the knowledge or consent of global populations. If we stand by and allow the decimation from the climate engineering insanity to continue, very soon Earth's life support systems will be beyond any recovery. This is not speculation, but a mathematical certainty. [Help us with the most critical battle to expose and halt the climate intervention/weather warfare assault](#), all of us are needed in this fight. [DW](#)

I am a high school drop out, I don't understand a lot of the words here. But I do understand what it is about, I understand, and I'm scarred. I understand that those people are killing everything on this world I see and been seeing it for most of my life. I know that powers come in numbers, so i share posts like this one. but that's all i do. I thought and still think that every thing , no matter how big or small that someone does to get it out there , pass the word, to wake people up to be aware is good. , I am wanting to do more of something, . but my education and lack of it, don't really help. But I hope to gain more ways and ideas to help and be apart of taking these greedy, selfish, murdering, money hungry, Earth killers down. I know my comment is not an educated one , but it is mine to share with you all. I believe the more we get the word out the more it helps,

Don't feel helpless. Always keep an eye on what they are doing but be positive and focus your energy on the good things in your life. We have to spread this good energy around us just give the good mood around. Sure spread the word on the news you hear or things you see but don't get all caught up just like the way they want. Don't be scared. Inside you there's someone waking up, someone who knows no fear or courage just infinite wisdom.

I have noticed in the last 6 weeks or so that there has been a drastic reduction in the spraying in Kent and the surrounding counties where I drive almost daily. I found it curious as I have been watching for years and the skies are frequently heavily engineered. Just thought I would mention it.

I am certain these sprays are of a military nature. Everyone is reporting here as well, massive trails unlike they have ever seen before, all concurrently. I think this has to do with the highest probability ever of nuclear war. The MSM is silent on how close we are. Putin just enacted a no fly zone over Syria and demanded NATO missiles be removed from Eastern Europe or prepare for attack. This is the talmudist dream made manifest. No Pax Judaica can exist as long as Russia and the US remain, their goal is to annihilate both and I think they are close to getting their dream. Russia just held a drill for 40 million to go into bunkers. Its so tense but you wont hear anything on the MSM. Traitors and god I pray justice is meted out to these traitors. Such evil and sick people, so very tired.

I live in southern Calif and witness daily the non-stop assault on us of the chem spraying – I speak out about it to everyone I know yet they ignore me and act as if I am making it all up – all they have to do is look up and get off their damn cell phones and stop being concerned about partying and playing and see waht is happening...it's as if they are blinded to the truth or choose to ignore it...i get so angry at what is happening every day it becomes hard to cope with on a daily basis – what the heck is wrong with the masses, and why are they refusint to acknowldege what is going on – we are victims of a geo-engineered draught here and i pay the price big time for trying to keep things green here since i refuse to be like most others and let my yard die out...it is becoming insane.

Am I the only one who thinks it quite strange that the Senator from Haiti just spoke out against the Clintons, and asked Donald Trump to come and visit his country, and within 2 weeks Haiti is devastated by a hurricane? Look on You tube, you can see he attended one of Trumps rallies and spoke out about how Bill Clinton tried to bribe him into letting their foundation skim money off the Haitian relief operation after the earthquake. Then this...the timing is just too weird not to be connected.

Furthermore, up here in the PNW, we have been hit with unrelenting rains for the last 3 or 4 years, just pounding and pounding, yet our Gov. IdiotStick Inslee files for drought relief? WTH? I take pictures almost daily now of chem trails, fly overs out way far away from any airports or military bases. it is almost daily now.

Lastly, my husband and I have had month after month of problems with breathing, coughing, and just feeling unwell. When I have complained to the FAA about these fly overs and low flying aircraft, and how its affecting us both physically and emotionally, they have refused to address it. What does that tell you?

Keep up the good work, many of us our here are watching and listening!!

Your vaccines, coupled with the environmental factors are causing illness as well. Please do some research. Not with anything that ends in ".gov" or has CDC in the name. Look up Dr. Just Mikovits. She stumbled onto problems with vaccines while doing cancer and HIV research for the gov't. She thought she would be congratulated, instead, she's been arrested and her life destroyed. Look up her interview. And find someplace in your area showing the movie Vaxxed.

Pesticides and vaccines and GMO'S are all playing a part in our health and it's not good. Mississippi has the highest infant mortality rate and has the highest compliance with vaccines than any other state in the nation. Please look this info up. We MUST stop poisoning our kids before the elites use them as slaves when we're dead and gone!

NOAA's latest projection for the track/direction of the terrorist-controlled Hurricane Mathew has this guided weapon doing a full loop back to where it originated. This trajectory, if fully implemented, would be one very strange maneuver. Further, Hurrucane Nicole is just off to the east of Mathew. This has the potential for some very interesting showcasing of just how good the weather sociopaths are at playing god.

I think their mixture is much more concentrated than it used to be. It really affects me when they do their super cool downs. We have one day where it was 40-50 yesterday flanked by 80-90 degree heat. Just one day and on that day every single person I met said they were so very tired. I too am tired, brain is like to fuzzy halves. I fell like I can't get enough oxygen... Its like my brain is going cross eyed. The only way any of this makes sense, this world makes sense is for me to believe the world is altogether an evil place. There are good people, yes, and to me this evil world is a trial of sorts, where the base impurities are cleansed in the fires of a hellish world. I look back on history and there has never really been a time of happiness for any people, any where. it is always swallowed by night. Now we breathe these dark vapors into our bodies, the temple, and it pollutes our very being. If it is indeed some trial, I actually am glad that it ends one day. I grow so weary of man's inhumanity to man. I do not know, I do not know I can only hope there is a God for how could I worship any God if this is reality, this world. No, I must retreat into my soul and view the world as a game of faith and trial of sorts, there is an old saying...God made Earth to train the faithful. One cannot go against the will of God.

These pictures are of HAARP technology being used,,,just like throwing a rock into a pond,, you get ripples in the water leaving the site where the rock hit the water. When HAARP technology is used it bounces frequencies off the ionosphere back to earth and when these frequencies return to earth they pass through the lower atmosphere just like a rock hitting the water. The ripples are just a tell tale sign of this happening. It happens all over the earth every day because "they" completely control ALL weather worldwide. All of these pictures are of areas that are being droughted and where the jet stream is being diverted around the continent or country.

Stephan: A sobering perspective. And one to which I subscribe. The NWO and its internationalists, including the Zionist/Neocon cabal who produced the 9-11 catastrophe and con, are the pushers for Suiciding the US (modern Babylon). Given how much attention our rulers give to our entreaty to cease and desist with their geoen지니어ed destruction of our weather, you can well imagine how influential our letters and phone calls to our rulers to plead and beg them to cease provoking World War 3 will be treated. I was a teenager during the Cuban Missile Crisis. That was a close call, and thanks to President Kennedy and his sanity, we negotiated.

We have no sane leadership anymore. One hope is that the military rebels while they still can to stop these assorted nut cases. Nuclear war was averted and I have had a rather long and happy life. The situation in Syria is very, very serious.

And Putin repeatedly has stated to the Western MSM in Moscow that our Western Media are perverting the truth about the issues and that he is very frustrated because he and his message are being censored. I honestly conclude, short of a miracle, that we are going to experience the "unthinkable." And the timeline is short. Sorry, but quite frankly, I take ANYTHING from Alex Jones with at least a grain of salt. Knowing how he's dealing with the reality of geoengineering, he is not, and should not be, the "go to" guy for your news. Remember, the best disinformation is 98% truth and only 2% bullshit. All I've ever done is take care of my family and myself and try my best to care for others physically and mentally through my career. AND to spread truth about things like geoengineering. That kind of thinking is dangerous since it's not much different than the elites who feel they have a right to decide the rest of us are expendable. And we spend a lot of time on this site bemoaning the killing of trees, other plants, animals and humans, so just because you're fed up and becoming cynical doesn't mean it's suddenly ok so say OK, now we can destroy everyone and everything.

CROWD CONTROL

Mark & BaneB

On 12 September 2017 I attended a very large protest rally, the largest our town has ever seen. I later made notes because I suddenly felt ill, giddy and nearly fell over. I did my best to recover, but was only able to do part of the march. A titanium pin in my femur, though it had given me no trouble for 13 years, suddenly made it almost impossible to keep up ; I was forced to take shelter under patches of shade offered by trees along the march route. I then sat it out and watched hundreds and hundreds of people march past peacefully. At that point I had not enquired into or researched geoengineering ; I viewed it as a commercial device – typical Joe Isuzu gobbledegook – for denying climate change/global warming and avoid necessary remedies – one of which is making land ownership obsolete and granting only tennancy rights with land rents paid to citizen-managed public-interest investment funds (free schools and universities, public transport, lifetime wage, adequate pensions, conversion to renewable energy, etc.). The cost of such a programme has been priced and it works out at less than current spend ; a moratorium on debts incurred specifically to rob the commons (some of it cancelled) is part of the proposal. It would finish off private banking, which is to be replaced with public banks. Land reform avoids the speculative spiral in real estate prices which feeds the offshore financial bubble, graft, arms trading, drug peddling and tax fraud. It also puts a damper on inflation. See MICHAEL HUDSON
<http://www.counterpunch.org/2017/10/20/socialism-land-and-banking-2017-compared-to-1917/>

To my surprise the symptoms I experienced are described by several people on this blog, as well as phenomena like "hard blue sky" and UV rays. In retrospect, it appears that Raytheon technology has been successfully used to harass protesters intent on overturning retrograde Labor Law "Reforms", in France. Macron has very strong links with Tel Aviv mafiosi and has recently made a Hail-Fellow-Well-Met visit to the leadership.

I note that many people here blame m*therf*ckers for all these troubles, and point out for your interest that Macron

himself is a genuine Grandm*therf*cker (worse!) and his government is run by a gaggle of sh*tface Havas PR people. He has stacked our parliament with industry lobbyists and former Human Resources Directors of the sort who have cashed in on major layoffs ; they plan more. We hate them mightily.

This is one busy body .

His father was a chemical engineer from West Germany and Peter was born in Frankfurt . They moved to the states when he was only one or so . He attended "Stanford Law" . He made his first big breaks with "Pay Pal" and "Face Book". Now he makes his money from just about every security agency in the USA including the CIA , NSA and DHS . His biggest finical black hole pet project is immortality , seriously . He needs the blood of the young so he can get transfusions in hope that he may live forever. Between him and Keith Richards they must put a heavy strain on the blood donor clinics .

He thinks climate change and global warming are trumped up . Speaking of Trumped up , Trump just got a thumbs up from Peter Thiel . Peter was also the major contributor of Ron Paul's 2012 Presidential campaign , 75% of his total campaign funds came from Peter Thiel . It leaves little doubt why Ron Paul does not condemn or even recognize climate engineering .

This Peter Thiel guy is way out there but there is something about him that I like , that's why I think he should get a window seat on the Red Dragon's maiden voyage to Mars .

Hello everybody.

Ok, I have now the info about the site where we can track the F planes. I notice too that Mr Imakawa San posted this same info some time before, therefore this is not new, but important enough to repeat, I'm sure.

The site is <http://www.flightradar24.com>, in there we must look the app, and must have GPS in the android phone, of course, then it is necessary to install Google Earth, if you don't have. After it's only pointing the phone into the air and track the MFs with the camera to get the info about the flights. Have fun..

Please sign and share this new White House petition, thank you.

The Arctic Methane Emergency Group and the IPCC have stated it is game over for our planet in the absence of climate geoengineering. The spraying of our skies is in full force. We are being sprayed daily with toxic nanoparticulates, such as aluminum and lithium, without our consent. Many US States have taken action to stop this omnicide. Our demands for answers and action are being intentionally ignored by Congress and The White House. The media has been silenced, which is a cover up. Get the facts at geoengineeringwatch.org and take a stand to say NO to the ongoing climate engineering that is poisoning all of life. Look at our skies, our trees, speak out about your nosebleeds, headaches, vomiting, ear ringing and heart palpitations. Sign and share our petition to END geoengineering NOW.

Erik: Same here in Mendocino County. From a couple days ago the geoengineering assault has been in full swing, especially today. And there is a reason. The jet stream is flowing from north to south over California. The moisture field and forming low pressure would bring rain to us here in the north and to your parched southern region. That is not in the cards because these weather terrorizing psychopaths have no intention of letting it rain, especially in your region. Once these schemers have convinced Governor Moonbeam to legislate the capture of all those long held grandfathered water rights, and dried up the fertile Central Valley, with land going for pennies on the dollar, and it all in the talons of bigger fish, you can be sure the rain will return. Also, I recommend you tune into 1PacificRedwood. He is in your area and does a real service with the satellite evidence as to what the bastards are doing to us.

Erik/Marie: The entire State of California is under siege. I was just this morning over at There is a low heading your way from out in the Pacific. The flow off the ocean is direct to you. And yet the humidity level is 15%. Given the reality of massive spraying in front of and on top of this, as well as up here in Northern California, the weather terrorists are drying out the atmospheric moisture and creating that white toxic canopy we all are breathing into our lungs. Surely, your local, state, and federal reps and agencies see this. By now these tax consumers surely realize something is amiss. But, like up here in the north, they hear, see, and speak nothing about this in-your-face "covert" "Manhattan Project." Once the internationalists have pushed down the value of Central Valley farm land to their goal and gotten hold of the water rights I suspect these criminals will turn on the tap. A few more years and we will all be crying "uncle."

I work in the mountains by Big Bear Lake for the past four seasons, and have many photos of spraying going on. I photographed the spraying that caused the flash floods in Arkansas, the storm that produced the tornado in Oklahoma. I work outdoors and have watched the skies for almost 20 years. This summer the spraying stopped from July until Sept 24, except for a few dots and dashes during these months. On the 24th spraying began in earnest as a storm front (BIG) moved in. Since then I have watched as two or three fronts have been dispersed before the clouds could even move over the mountains. All the big guns were brought out to stop the moisture from coming inland to provide water to a thirsty land.

Point out to your friends the sparkling Aluminum particles in the dirt! Ask them to tell you what and where they come from. Why are so many people having respiratory problems? Today

we have silvery blue clouds and not a speck of anything in them. 10-9-16 big Bear Lake.

A couple of half and fully baked thoughts on this and my personal exposure to 4 decades of toxic leaks from rocket fuel

plant next door to family ranch.

Hillary – Evil walks the earth. Bill – front persona for Hillary.

Chemtrails – between alloys and chemical combos there are unlimited possibilities. Add nanobots and the stew can be focused. Sounds odd yet the reality of what 'they' are up to is scarier than anything imaginable.

NWO – Darkest vision of life on earth conceived to date.

Rocket Fuel – Pratt & Whitney now, UTC CSD in the beginning, began production in mid/late 50's. Their scientists and lawyers knew damn well they could not contain the poisons used to make and left over toxics while producing a mix that can usually be controlled. Think of shuttle Discovery as a time the fuel went from boost to explode. Can anyone anywhere explain why the cretins of Connecticut put their chemical and solid waste dump 300' from one of primary creeks giving water for Silicon Valley and 150' from our shared property line? My thought runs to analysis of adjacent property owners to ascertain which will be least likely to afford the battle for redress. During 60's an explosion or fire would usually send flaming shrapnel across us with attendant fires. Pretty much same in 70s. In the 80s one of their bright boys determined the best way to dispose of left overs was drill bore holes a few hundred feet down, steel sleeves for first 175'. As needed dump liquids in, meander to viewing bunker and press the button. Biggest piccolo pete I've ever seen. This and earlier open air burns used to send hours long clouds of the oddest color and texture smoke across the ranch. The company has ignored a court order we won in 1988 to maintain the unpermitted illegal concrete dam with 3ea 4' diameter culverts across San Felipe Creek. This has flooded one home and barn on our middle parcel numerous times. I guess taking out the huge grates on up stream side is their idea of maintenance in perpetuity. To finalize my rant those effin' A tweety arse kissing.... had the balls to use a picture of our barn, the one they flooded, in promo blurb when the 4,000 acre rectangle was sold to MidPeninsular Open Space group. That barn is next to the 200 acre parcel of UTC's that runs East and cuts our Southern parcel somewhat off. Thank God ingress/egress easements were done nearly a century ago because their local atty said, "Our attorneys can find no

record of easements." In my usual fashion I replied, "Well they must be pretty stupid because the easement grants track with grantor property not grantee." and walked out of time wasting reparation meeting. I've got the initial letter informing they have polluted us and will never be able to completely clean up. Also kept letter from Bay Area Water Quality Mgmt Board telling me to cease and desist re-opening windmill powered well below our 20 acre lake. The dam and windmill were constructed in 30's and 40's. They also contoured runoff in a way that sends all surface flow from 2+ mile ridge above it to the lake. It has only gone dry once since built. That was 3 years ago.

Pissed me those fucking jerks did/have and always will. Their new place in Florida is target of class action lawsuit due to 25,000 gallon spill of same damn chemical. It polluted water supply for 80 house quite expensive community. For UTC it is just same shit different day and location. If anyone would like kmz points or any other info feel free to contact me. This one is my rage against the machine but I'll only smash punkins for pie. Peace, out.

That is why for several months in your area and here in Mendicino we had relatively clear blue skies minus the obvious jet trails and morphing monstrosities. There was no real threat of rain or moisture. But the LA/San Diego area was sprayed like cockroaches to stop the tropical moisture trying to get into that region from Central America and Mexico.

Keep in mind that at times when there isn't a big weather event or a storm wasn't as bad as they had hoped, the narrative has slipped and info they didn't want to come out has come out. people should call it what it is..MURDER. deliberate destruction with weather weapons.

these insane monsters intend to create global war and what is worse? they can find people even more insane then them to fight it for them?!! people that put on a uniform and blow away anyone and everyone they are told is the latest flavor of enemy. it changes of course with the whim and will of the diseased minds that rule us. and yet somehow they get people to "follow" them? as a "leader"...that truly is insane.!! where do you get thousands of people..around the globe to do your bidding even when it means mass murder of innocent people and innocent animals, plants, fish ect?

the same mentality that sprays us like cockroaches is applied

to those in uniform on the ground. they handed over their souls to someone else's whim. they handed over their volition and reason to someone else. became a killing machine willing to murder for hire.

it makes me shake my head wondering how the heck ever came about? how could global societies have lost their minds so completely? to somehow think it is okay to murder as long as someone tells you to do it. "just following orders don't you know"....truly those people carrying out the SAG programs and global world wars have reached a level of evil even greater then those ordering it done!

My husband said the planes must have been busy doing something near the hurricane but he refuses to investigate geoengineering and doesn't really believe that. I said doesn't it seem strange to you that normally there are lines, haze, clouds, etc. and you can often see planes making trails yet today there is NOTHING? I mean if you think all the lines are from regular commercial air traffic and are just contrails, you wouldn't have rare days when there are NO jet planes (we always have small private planes flying around except in bad weather) along with no trails and clouds, you would still see the commercial flights every single day. He didn't really answer me. I know I've made this point before on this site but I don't understand how people can be so freaking stupid and stubborn about this when stuff has been pointed out to them again and again.

We need to find out what technology they are using it looks like something supernatural is taking place with our weather with very little footprints of evidence left behind other than the geometric shapes and unnatural weather patterns I mean if you think about it frequencies can already if done correctly move heavy objects like missal then it will be easy to move lots of particulats that water

bonds to and lots of water droplets because the weight and mass is so little if you want to have more of an idea on how weather control is done and how it feels to do it download an Aerodynamics interactive program on an electronic device and you can manipulate the smoke/particulates that would represent the storms and you can see what applications are more effective at controlling the weather on a device and two common methods used to control the weather the most effective and efficient are #1 Toroidal vortices and #2 simplification of a storm mainly through geometric shapes #3 manipulation of wind currents which means that they can make their own wind currents by applying frequencies that push and pull air #4 moisture scattering or scattering moisture and last but not least creating/deleting clouds all or some of these methods can control the weather at a serious level and of course this technology is going to be weaponized and abused.

Mindful of the ongoing & constant weather manipulation of Canada's western provinces this year. Bizarre cold & snow over Saskatchewan, Canada's bread basket. What started out to be a bumper cereal crop has had the grain quality lowered by constant rains which has doubled the harvest time & now it appears the last 20% may not be harvested at all. Look at the satellite shot today to see ridiculous cloud formation, rotation & manipulation. These I believe are ongoing experiments in eco destruction for the purpose of planetary control & suppression. Pointed my wife to the barred cloud formations comparable to these pictures over central coastal BC a few nights ago telling her that radio frequency was behind it. Another thing, we live in a very buggy place. Cluster flies are very prevalent this time of year but for two years in a row there has been no flies. Sometimes thousands will mass along the sunny side of the log buildings in the evening sunset before frost. Lots of frost so far but no flies. Spraying is ongoing daily but mostly over the Pacific, at night & over the cloud formations. Sneaky bastards!

Hurricane Matthew strengthens to a Category 4 Hurricane having 140 mph winds, with a central pressure of 938 millibars. Usually a Hurricane of this magnitude is very well developed and solid (tightly wound), but outside influences are scattering sections of the storm, it physically looks like a poorly organized Category 1 Hurricane, with a possible secondary eye wall forming. A new storm track, brings the hurricanes path into a loop, possible striking Florida for a second time, early next week! Category 1 Hurricane Nicole is out to the East of Matthew too, what path will she take?

Hello Dane and friends, thank you for your Work.

Mr Dane W., amazing Work as usual.

We don't have clouds anymore.

I think every Person with more than 50 years can remember very well that when there is wind, the clouds travel with the wind (having clouds, of course). Normally, and if we get old info about it, clouds stay trapped in the wind corridors, and travel free. Now what we see day after day is stationary clouds and white lines of aerosol that remain hours in the same local (sometimes forming new clouds, if atmospheric humidity allows it), moving only a bit, even when near the ground we have strong wind blowing all the day. Now under 4 km of altitude, more or less, and above 1.5 km, more or less, where wind is stronger (in the Wind corridors "zone"), we can't find clouds, with the exception when aerosol form clouds (by catalyzing humidity) near the top of small mountains or elsewhere when humidity is very high, or when big clouds that are formed in the Ocean come traveling with the wind from the West to the inner land (the very big and white clouds that "Andrew from scotland" mentioned some months ago in his e-mail – those that are sprayed with " fly coal ash " – that contains lead and arsenic – the very white and big clouds having sometimes a very black base, and almost always without rain).

In the other day I was talking with a guy from "my mountain" about this PROBLEM, and we were looking to the F planes, and he points his mobile phone to the air (he go to the net and show me a site that can track airplanes in the air if we point the camera of the phone to the planes) and with this he obtained all the info about the flight – from where it come and to where it go (!!). The flight was passing about 4.6 km high.

Now companies must fly much higher than before (because they fly over the MFs), with greater costs for the passengers and have to make shorter trips around the World because of that too.

I'm looking with attention to these MFs for more or less 6 months, and I see a lot of times very strange maneuvers in the air, like; for 3

times – planes crossing with each others with less than 300 m in between / for several times – alterations on the route with sudden turns of 90 degrees, sometimes looking like one decides turning to join a parallel route with another / and at least 3 times – big planes swinging sharply to either sides with wings, over and over (when spraying), like trying to empty (clean) the tanks from the F load. For me this maneuvers are impossible to be done with passengers on board.

For me the picture is this, level by level; 1st – low Atmosphere (always with the F aerosol mist) / 2nd – wind corridors "zone" / 3rd – with lines of aerosol – fake clouds – and MFs / 4th – (only above) we can find passenger planes (passing high and without leaving any F trails) / 5th – the Stratosphere – and "our" Precious and "dying" Ozone.

Don't want to be long – one more thing:

Without Rain Forests we are doomed.

Every Forest is important, of course. But these very special Forests breathe much more and through all the year (because they are in warm latitudes), they produce a LOT of water vapor and REAL clouds, and PURE rain (and of course – MEGA quantities of O₂).

These Forests – the Rain Forests – can produce Global Climate, as we know. And more – warm and very humid air when rises from Equatorial regions, eventually ends colliding with cold and much more dry air from above, and it is this way more frequently Electric Storms occur.

Without Electric Storms, only with (a lot of) difficulty Ozone reposition can happen.

Good Luck to Us All.

Hi Pedro, good post! Here in the Bay Area, in Berkeley, CA, I can remember years ago, decades? of watching big fluffy clouds blow west to east disintegrating as they did. And this not just when windy but rather with a constant if nearly imperceptible high wind. Now, a big fluffy might just sit there all day! I can see how young ones could miss this, but not those age 40 or more. To me, it is Very odd and unsettling.

Of course one could say that is the least of it, especially next to nearly festive sky tricks, but it is the most constant

reference, cloud wise.

By the way, love the point the phone, find the plane trick! Too cool for school! How?

Wondering if we could get a "log" listing who's doing what in the skies from ordinary folks phoning in ratting on the spray planes– just point, click and send the info to a website that rats on who's doing the spraying– what would THAT do? L-O-V-E to see it happen. A regular Hall of Shame.

And it's great for exposing what is nothing short of air so filthy, and not fit to inhale and still remain healthy. The weather matters not. Before a cold front, after a cold front, none of the toxic "smoke" ever clears out.

And my view was once nearly pristine. It's now a whiteout with distant mountains smeared in a white haze. No let up.

Why America Needs War

Dr. Jacques R. Pauwels 2003 / Global Research, Sept 28, 2016

"... The great strength of American capitalism is also its great weakness, namely, its extremely high productivity. ... During the Second World War, the wealthy owners and top managers of the big corporations learned a very important lesson: **during a war there is money to be made, lots of money.** ... the arduous task of maximizing profits – the key activity within the capitalist American economy – can be absolved much more efficiently through war than through peace ... **Military state expenditures were the source of high profits.** In order to keep the profits gushing forth generously, **new enemies and new war threats were urgently** needed now that Germany and Japan were defeated. How fortunate that the Soviet Union existed... **corporate America, the America of the super-rich – urgently needed a new enemy** in order to justify the titanic expenditures for “defense” which were needed to keep the wheels of the nation’s economy spinning at full speed ... It is for this reason that the Cold War was unleashed in 1945, not by the Soviets but by the American “military-industrial” complex, as President Eisenhower would call that elite of wealthy individuals and corporations that knew how to profit from the “warfare economy.” ... **the nation’s big corporations largely determine what the government in Washington may or may not do** ... Mars [the god] could remain the patron saint of the American economy or, more accurately, the **godfather of the corporate Mafia** that manipulates this war-driven economy and reaps its huge profits without bearing its costs. ... The media present no problem, as newspapers, magazines, TV stations, etc. are either **owned by big corporations** or rely on them for advertising revenue. ... the state has to cooperate, so in Washington one needs men and women one can count upon, preferably **individuals from the very own corporate ranks**... The America of wealth and privilege is hooked on war, without regular and ever-stronger doses of war it can no longer function... ... Welcome to the 21st century, welcome to [the] brave new era of **permanent war!**"

War is big business— capitalism loves war. The only difference now our wars are sanitized — by that not shown on television like the Vietnam War in the 60s and 70s. They show no body bags and it is like war is normal. There is also no draft. of young man . We are actually at war right now in how many countries? I am not totally sure but Iraq, Afghanistan , Syria, and more than just those 3 since we have military bases all over the world. 1000 military bases worldwide

The miscalculations founded upon a string of ongoing lies is what allowed Russia to take advantage of the 'vacuum of credibility' caused by the US supporting the terrorists who are proxies for ousting Assad. There has been no spraying here in Southern CA for at least a month. Then it started again this week, and heavy today (Friday Oct 7). By the early afternoon the sky was full of chem clouds, as I call them.

I wonder why they weren't spraying for all of this time, and then suddenly started up again?

o  *Dane Wigington* says:

[October 7, 2016 at 1:50 pm](#)

Hello JF, yes, the spraying has been much more covert in some regions, but it has still continued at some level in almost all locations. In many cases it can be much less visible depending on atmospheric conditions and the level of the operation. Any bright trail you see behind a jet is in all likelihood a sprayed dispersion, the short bright trails that appear to dissapate are especially prevelant with the heat of summer. We have film footage of the shorter trails being turned on and off, this is not condensation. If your skies appear silvery white when looking toward sunrise or sunset, then the air is full of particulates. The horizon to horizon trails are only one aspect of the climate engineering insanity. Changing seasons and the geoengineering objectives will again reveal the more blatant spraying patterns as you have observed today.

Hurricane Matthew is being kept away from Miami and NY/NJ. This is to protect the immense wealth in these areas. Every time I put a comment on a weather website to expose this, I soon after get a reply to paint me as a "one of those wackos". The last one said I was a (wakadoodle). These are not carefully thought out replies and give the appearance that my comment isn't worthy of consideration. The shells monitor these websites for any use of the word geoengineering, climate engineering, chemtrails etc. It's part of the ongoing effort to debunk and embarrass anyone with knowledge of their weather manipulation.

Why are they so desperate to keep this a secret? Wouldn't it be a good thing to steer a storm away from areas of wealth? Yes, except when they steer it away from one area that means someone else takes the hit. If your home was destroyed under this manipulation I think you'd be pretty angry and want to sue. So, they are destroying others to protect their wealth. That's why they are so desperate to keep this all a secret. In addition, the money to carry out these atrocities is probably coming from the taxes of the very people they are destroying.

These people are without any morals or principles and I think quite dangerous.

i live in essex in england. The skies above me are full of human filth. The airport authorities wrote to me a couple of years ago to say they were going to change the flight path into london and instead they have filled our skies with their foulness. I am a gardener, have a Bsc in herbal medicine and a wild food eater and have been engaging with plants for the last forty years. This year has been the worst i have ever seen. Many young birds with obvious growths this year have died. Insects – hardly see 'em. Little rain this year and when it does 'rain' the land is not cleaned as it was, and the foliage has black stuff on them. Nothing is growing properly but if, as you say the sunlight is different, then that is why. Have also noticed burning on the leaves, where obviously stuff was not mixed properly and it has fallen to earth in lumps and burnt the plants. Have to stop worrying, specially cos i eat plants directly from my garden – how can i stop – i am poor and cannot afford the supermarket food – doubtfully healthy anyway.

Have been watching the colours in the skies for years – wondering why the sunsets were strange colours. have decided to chase this through our lowest government – parish council – it will be a struggle cos i have been a councilor before and know the attitude of the others – mostly retired people with money and no real consciouness

Gormless – a word my mum used when i was a child – old indo-european word meaning (you've guessed it) not awake! Do people sleep because they would have to act if they were awake – most people in this so-called free country we live in have always been treated as serfs – to underpin the norman aristocracy – 1000 yrs of suppression – that is why they sleep. tis not the dreaded 'anglo-saxons' – tis an illusion that the english and the british are the

same – the british (of the british empire) hide amongst us and call themselves english – but they have their own society within. They go to private schools where only known families need apply. They use private schools, private health and their own circle of friends and society. They don't mix with the likes of us. How do i know this – my dad was poor but was born in london of long term london people – when one lives that close to the wealthy – one knows

enough of the doom and gloom. having had a crazy out of the main stream life i am not too concerned about popping off but i feel for the people who have children. tis dreadful!!!!!!

doesn't matter what we eat. it is all tainted and polluted these days. we just harvested some apples from our heirloom apple tree. the apples looked almost completely black.! spotted like dipped in tar. brought them inside and washed them and the black goo washed off but we dare not to eat them. figure the toxins that coated the skin black probably reached inside as well. we might decide to just peel them and turn them into

dried apples. pretty sickening looking stuff. like a black tar. it coated every apple on the tree...some still have green and green showing through the black gunk.

the trees, ground, grasses, air, water. all are poisoned. deliberately as well. it makes no sense to me to kill every living thing and the planet as well if your goal is only to cull the human herd. there are plenty of other ways to cull the herd then to waste the whole planet and life on it. have to wonder what other goals they have in mind...i am sure they have a number of them. those who rule planet as if they own it and all life are truly evil.

A picture paints a thousand words . The Nasa photo's say a lot . Speaking of Nasa , here is a Nasa contractor who's biggest fear for humanity is climate change . Climate change scares him so much he wants to colonize Mars to save humanity . He would like to get the ticket price down to about \$200 000 from the estimated 5 000 000 . I guess I will be staying here . If this idea sounds like madness to you your not alone . However the colonization of Mars could be a good thing if they would send all those that are hell bent on destroying this planet , it could be the new Australia of the

universe . If they sent the kooky kabbal to mars I'm sure then the American population wouldn't mind spending billions of tax dollars on this project .

He once bought a F1 race car then promptly smashed it up . He just might be a little reckless . If you are on the flight to mars try not to think of that little detail . His pet project is conspicuously called the "RED DRAGON". Why am I not surprised ?

This guy has spent more on lobbying than most of will make in a life time . He donates to both parties although he heavily favours the democrats . He has an idea of direct democracy over the internet which sounds good but I can't help but think that it could be hijacked so easily by those warped on domination.

He and his companies will receive an estimated 4.5 billion in government subsidies . He co founded " Pay Pal ", he bought " Tesla" and founded "Space X " and he has a huge contract with Nasa . Meet **Elon Musk** (Mr. squeaky clean , I highly doubt it)

So ALL were paid to today to zip their lips. They should insert a TV commercial saying: "I am Lucifer-and I approve of this message". Check out several vids on Before its news site as there is a 10 min. vid suggesting a NEW Saffir and Simpson scale be added to the usual 1-5. Having a ramped up Category 6 would accommodate the faster wind speeds the power elite have whipped up. The last Cat. 5 was in 2007 -Nicaragua . This is damning evidence, but those in power will still deny it, claim it's photoshopped, whatever. They have lying — their only M.O. — down to an art (apologies to all artists) and lack a conscience or the ability to care about anyone but themselves and their acquisition of power, money, property, and slaves.

Their use of technology to, e.g., make Hurricane Sandy turn West, or to drought California is a taste of what's to come if we can't awaken the masses. All the chemical particulates floating down on us make fire suppression virtually impossible, and poison all our food and water, not to mention our air. In other words, we, the people, are the enemy they are trying to eradicate.

So, let's see: we are being poisoned at every level — multiple vaccines at birth, GMO "foods", fluoride and other "leftovers" in water, soils completely depleted of minerals, sun being blocked, fracking on fault lines, oceans being killed from our waste and war games, forests being cut and replaced with animal factories, an FDA/USDA etc. owned by bigPharma feeding most animals hormones and antibiotics (anti = against, biotic = life), on and on.

Add that all up and it's hardly a surprise people are dumbed down and drugged up to the point they have next to zero brain power.

If it weren't for Dane and all you wonderful people, I'd have no hope. We're on a huge uphill battle, but we must carry on and do what we can to enlighten the masses. In the meantime, save seeds, plant seeds, sprout seeds and eat them, and look after yourselves. If these psychopaths make a wrong move (on purpose or accidentally), it could mean that we'll no longer have access to fresh fruit and vegetables, clean water, and electricity for up to six months, or longer if volcanoes go off, or an EMP hits us, or...

Please take this time to educate yourself and practice that Boy Scout motto: Be Prepared. And share knowledge, and love...

Wow, these photos are incredible. Dane is unbelievable, I don't know how he does it. One of these would make a great billboard, and lead to instant belief. Has anyone seen that one on YouTube, someone made a nice video and used big chunks of Dane's videos, then at the end there is a satellite photo of the Mother Earth with climate engineering. There are so many lines of white all over the globe, not the radio frequency manipulated type, just the straight white lines of the trails, that it looks like the earth on coke, like those lines of cocaine after they have been made with a razor blade like in the movies. The Mother Earth on coke, what a new low, but it would make a terrific billboard. Or one of these, a picture is worth a thousand words, and labeled as a satellite photo there would be no denying the reality, then there could be a line about the ongoing climate engineering insanity.

Dane: These are absolutely incredibly alarming and fascinating examples of what our government is doing to us. And, happy to say, they have finally convinced some diehard refuseniks about geoengineering. Early this evening I had two friends over (one a schoolboard member in Shasta Co) whom I have tried to educate

about weather warfare, etc. for sometime. I showed them these pictures and they read your column.....you are right, a picture is worth a thousand words. After their initial shock at seeing the 'evidence' they were sold. Knowing these people will pass on their newly-found knowledge to others made my day. Even one at a time, the word will spread. The title picture is *clearly* the aerial view of **West Marin county, CA**, *the county where I live... ROWS?* Of "clouds?" Off of Point Reyes? Why the F()CK are the idiots doing this right over a *National Seashore area?* Well, after Dept. of Interior Sec'y Ken Salazar signed off on the bad science in service of Agenda 21 that got the Johnson Oyster company kicked out of the south side of Drake's Bay (the curved area south of the point– great beaches, BTW, and all less than a 2 hours' drive out of San Francisco, so come on out and visit!) I thought "they" were all about "preserving" the "environment" over there– so much for AIR QUALITY over their precious National Seashore "wilderness area–" HA!

Dennie. I thought about you the instant I saw the first photo off of Marin. There is no place to escape to. Such a joke to cut the spray over a national seashore and then it floats and falls out over it!!!! We don't need the Tahoe Regional Planning Agency, either (an unelected bi state board that doesn't acknowledge this elephant stomping on the environment of the entire globe). Imagine the money that could be redirected

if they stopped the deception and distraction that the planet is spinning around today. The keys need to be handed to the mothers now.... for healing. ONLY a order following, testosterone fueled gang of earth rapists could accomplish what these photos reveal and prove.

Dennie: My favorite place on earth....Point Reyes! Yes, and it really ticked off the people of the Bay Area and in the area of Pt. Reyes because the Johnson Oyster Farm was a great resource for purchasing fresh oysters free of the toxin that shut down on occasion the oyster operation over in Marshall. Frequently I would drive from Marin over to there and purchase large quart jars of freshly shucked oysters. The operation was clean and a joy to see. That rural road into the farm was graveled with crushed white shells. Hat oyster farm had been there many many years and the arrogant bureaucrazies kicked them out because they could once the Feds got their hooks into the land grab called the national seashore. Compare that to Muir Woods. I briefly worked there way back in the early 70's. The concession building was located OUTSIDE the park. The redwood forest of gigantic trees was accessed via graveled trails. Somehow the concession owner was allowed to construct a humongous gift shop structure INSIDE the park among the redwoods. And the trails were paved over with macadam.

o  *Dennie* says:

Well, and we had the Americans with Disabilities Act, so the parks had to COMPLY to accommodate folks in wheelchairs who want to see the redwoods. Yes I remember that crushed oyster-shell paved road out on the rolling moors of west Marin. And now the assholes are going after the RANCHERS out there, tryin' reeally hard in the upcoming election to get the "right" supervisor in there who'll kick the ranchers off the land in order to– what?– create a "wilderness area" so the tule elk population can run amok, then blame the cattle for any disease that pops up out there and gets the ruminids. NO

ONE'S talking about Strauss Family Dairy, an organic dairy farm on Tomales Bay that uses methane digesters to recycle the cow patties back into energy once again. Instead we're hearing about how dirty and wasteful the dairy farms all are—who needs food, anyway? We're just a bunch of "useless eaters" (and *you*, Henry, the worst of them all, may Kissmyassinger!) and besides, we can always fly our food in from Chile or China— !!!!!

As a violinmaker and restorer I have worked with "curly maple" for decades. About 5 years ago I became aware of what seemed like a heretofore unnoticed (or nonexistent) cloud pattern that started to recur more and more frequently. I always called them "curly maple" clouds because of their resemblance to the figure in the grain of the wood on the sides, necks and backs of violin-family instruments, semi-parallel stripes that seem to undulate under a varnish. At first I was puzzled by this aerial phenomenon but

nonetheless thought it rather beautiful. And in some unsettling kind of way, they are sort of amazing. But nowadays, when I see this kind of crap I blurt out obscenities and "flip birds" to the sky. Knowing what I know now, I see not "nature's beauty" but only the signature of a sinister and thoroughly soulless cabal of masterminds who have, through infinite funding, co-opted some of the best scientific minds on earth to do their bidding. Here again, I stand in complete incredulity that there exist so many scientists apparently ready and willing to earn their paychecks doing research in their chosen field knowing full well that their expertise and scientific genius will be in the service of what is essentially a "war machine" by any other name. I mean, look at the Second World War. Thousands of scientists became devoted to contributing technological advances in the service of their respective country. The best science on Earth in the service of destruction and death, rather than ecological balance, free energy, harmony, sustainability, etc.

The photos Dane has posted tell a story. A very sad and depressing one. To see on full display the mind and soul-shredding power that these motherf**kers have at their disposal is deeply, deeply disturbing. And it fills me with internal rage because we are all impotent nuisances in whatever game it is that they are playing, as far as they're concerned. I'm still convinced that these pricks are, in reality, few in number. Their strength is not in numbers but in the highly advanced technological toys they've been handed by the traitorous scientists (defense contractors) who continue to whore themselves for this clique of heartless losers who fancy themselves Gods.

For the most part I agree Marc, who among us would not?

But what makes you think the government/military has co-opted some of the best scientific minds on earth? I'd say, no they have not. Scientists are having a rough go of it now.

With the government running universities and pre printing sites, they cherry pick ideas that suit them. Some brilliant ones get passed over and go wanting for work, for any income at all just because of this. Whatever brilliant plan or breakthrough may never get to see the light of day. They are picking mediocre scientists who will do their bidding. So, we have allies in the Sciences, spinning wheels going nowhere. They are beginning to speak out-about their confinement, exclusions, restraints and the brick wall they've hit. Perhaps, somehow, we could persuade some of these guys to spill Their bitter beans, not paid for by the government, rather held back by. Hmm. How could we do that? Well, for one thing, someones could start going through the pre prints. Though the government is trying to limit that for obvious reasons. An egg head hunt? Tedious work.

Yes, Virginia, likely hard to convey sarcastic 'humor' on a message board, my thoughts are simply made tongue and cheek and I completely understand who the greatest terrorists are. But as I said, and Dane has conveyed over and over, getting the info out on geoengineering and vaccine assault to as many people as possible in order to achieve critical mass is going to be a key step to proceeding further in trying to stop the insane damage being inflicted daily on us all. I really do believe finding creative ways to reach large groups like teachers, nurses, police, firefighters, students, etc. people somewhat 'within' the system, en masse, who do not *directly* profit from the insanity, would go a long ways in helping stop this assault on humanity.

Dane, if you happen to read this, do you do radio shows by phone? I live in a large college town, with a local grass roots radio station that has a radio show that spends one hour a week (with a call in or in the station guest) looking into issues that affect us all. It is KOPN in Columbia, Mo., (google) maybe not a *huge* audience, but a venue that would be a great way to get the message out further. Also do you do appearances, (I realize time and logistics challenges) I think there would be great interest among the 25,000 or so college students (3 colleges) we have here and

on the many other U.S. campuses. Our young need reached, with their idealism and often boundless energy they would be a great force (if educated) to mobilize.

@Yamakawa, I am highly aware and for a very long time of Dr. Hansen's shortcomings. I had some hope that his refusal to speak out might be nullified by no longer being with NASA, but perhaps he signed some life long thing. To me however, this is a foot in the door. This Will make more people aware, especially conservatives as they love Hansen so much. And, it gives young people, under age, some say, some position to take in this mess. I am not advocating his ideas. Or lack of them. Just acknowledging a growing group of peoples trying to do Something! As I said before, there are dozens of anti-geoengineering activists in DC right now, just wishing we'd all call our representatives, even if we have before as they are blitzing them. One leg they are standing on, is that of cloud seeding. They are basically going for an injunction to stop spraying, under the auspices of cloud seeding as a problem in and of itself. Sounds too simple, but they don't think so and yet another foot in the door. Maybe if enough feet in the door, the door will open wide enough for 'the elephant in the room' to enter. All people can't be the saint Dane is. All of us agree Dane is unique. But many want to do Something Now! I have trouble seeing how that is a bad thing. I would hate to see us

fail over ego issues. Or various ideas of what should be done and how. I do not believe all that should be down to one person and those who back him. This would create too much divisiveness in a situation where many want to be heard, and many have their own take. So let the games begin, the discussions, the various efforts and let them be relentless until all get it right. We've bit off far more than a person can chew. So, I'm thinking, bring on all the chewers. Heck, the Paris accord went through. And its not perfect by a long shot yet took one heck of a lot of doing. Washington state environmentalists are arguing over two different systems to fight pollution, carbon pollution, cap and trade, or neutral taxing. All over the world it will be like this. I knew a staunch believer in the world is going into another ice age, a very educated man, who would not listen to me until I told him about Hansen saying the Earth is warming. That's how much influence Hansen has. These are cracks in the dam. Let the flood of awareness begin!

Our Sunday SF Chronicle paper's Earthweek: a diary of the planet, had interesting things, as usual, but more so! Such as: Northward Terns. : American researchers were startled over the summer to find a pair of Caspian terns nesting 1,000 miles farther north than the species had ever before been seen. Typically not found north of Washington state, the birds successfully bred in Alaska's Cape Krusenstern National Monument. For these birds "to be 1,000 miles further north attests to how much the globe has warmed," Stanford University biologist Terry Root told the Guardian.

Taiwan had its third! typhoon in one month!

Five lionesses in Botswana have mysteriously grown manes and are showing behavior typical of males, with one roaring and mounting other females. Reports of such cross-gender behavior in lionesses have been rare in the past. ... "likely an increased level of testosterone has developed in those affected females in the Okavango delta." Researchers believe a genetic variation may be behind the phenomenon.

Jellyfish invasion in Adriatic Sea, costing seafood industry billions,

hitched ride to there via oil tanker ballast waters! Of course.

Trampling of the Planet: Australian scientists say they have mapped human's footprint on the world and found that 97% of the most species-rich areas of the planet have been seriously altered by our activities. Only a very few remote areas have escaped damage.

"Humans are the most voracious consumers planet Earth has ever seen...we are now directly impacting three quarters of the Earth's land surface."

On the upside, Dr. James Hansen, now ex! NASA-is that helpful to us?-he and his gorgeous young granddaughter, Sophie, wrote a paper called 'Young People's Burden' about the state of things we are leaving to our children and grandchildren. And are now suing the US government via the US District Court, District of Oregon. !

This came from the group: T Think Progress. Their main aim is to make people aware, and to stop fossil fuels-development and use of, in effort to slow/stop global warming. And to clean up our mess! And we use to say that to the kids!

Last but not least, from Sept. 26th and the Civil Rights Watch Dog: EPA is failing its environmental justice obligations,. Coal ash was front and center in the US Commission on Civil Rights input. And a 2015 Center for Public Integrity Report found that since the mid 90s, the EPA rejected or dismissed complaints 9 out of 10 times.

Thanks Rachel, saw James and Sophie video. "a beautiful story".... Dr. Hansen seems to "focus his views" only to CO2 emissions and global warming issues, mainly from fossil fuels. Not a single word, HAARP and chemtrails, contrails(geoengineering) mentioned in his websites.

A forgiving benevolent view would say, some academics have to refrain to the rules in the community to protect themselves from being ostracized. If they are discredited, they could not deliver anything to the public, in the first place.

A stern view is, it is a good example, a display of what a hypocrite would do to survive in one's local happiness.

> We and our children could end up facing a choice: **massive geoengineering or catastrophic loss of species and major human dislocations.**

> **We have already reached a point such that a lot of “soft” geoengineering will be needed**, even if we get a global agreement on a rising carbon fee. **Soft geoengineering refers to** things such as reforestation of marginal lands, improved agricultural and forestry practices, and application of biochar and other **techniques to increase the carbon content of soils.**

> developed countries are going to need the cooperation of developing countries in various ways, including preserving forests, reducing non-CO2 climate forcings, and perhaps implementing soft geoengineering to raw down excess CO2.

Reparations should be continually dependent upon demonstrated cooperation in these matters.

excerpts from Dr.Hansen's article

<http://csas.ei.columbia.edu/2014/08/14/jeremiahs-progeny-our-dilemma/>

His statements seem to prefer on standpoint of using CO2 as another form of currency. Hence, in a preference of preserving the structures in tandem with the current monetary system.

He seems to imply the existence of **“hard” geoengineering**. His “soft” geoengineering examples only mention about the control of carbon. He seems to be neglecting the already prevalent soil contamination throughout the globe. Probably not his academic specialty field.

Hello Yamakawa, thank you for exposing James Hansen's statements of deception. Hansen is a part of the problem, not the solution. Hansen's willingness to blatantly lie about the climate engineering issue and the total decimation it has already been causing for 70+ years is inexcusable. If he can't speak the truth without being threatened, then he should sit down and shut up. For Hansen to pretend geoengineering has any benevolent aspect whatsoever is patently wrong. Hansen is a part of the deception, an accessory to the climate engineering crimes.

Boy, we oughta hop on Hansen and get him on our side! As with Marsha McNutt, I just do not believe he doesn't know about the ongoing geoengineering programs, hiding in plain (plane?) sight, with all the Congressional Committee reports—how could you not? If I were God for a day, I'd definitely rewrite those Ten Commandments, with the first now reading "Thou Shalt NOT Make Messes Which Canst Not Be Cleaned Up— PERIOD." And if you *did* think you somehow still could, the Thought Police would immediately see to it that you were teleported to another time and space dimension where you'd be quarantined safely away from those of us who do NOT share in your death wish, until which time I decide I am good and ready to come and get you.

o  *Rachel Robson says:*

[October 6, 2016 at 7:35 pm](#)

@Dennie, of course! Hello, and yes a vague hope of "turning" Hansen, however hopeless that may seem and however limited his insights are. Yamakawa suggests his lack of addressing soil contamination is that it is not his field. A kind view, and also presents two scenarios: benevolent and stern. Sometimes I feel benevolent, sometimes stern! To me, my take, was that his young granddaughter wanted to Do Something and asked her grandfather for help. The plaintiffs are 19 other young ones, and herself, with him as her guardian. In this video they made, he looks so old and worn.

By contrast, she is beautiful and open and so innocent looking. So I guess my take in their effort is benevolent while holding out a shred of hope that he will see the light.

Obviously Hansen's field is limited by NASA. So, I tend to agree with you that he must know, or, is it possible he was so locked into his own area of expertise, he never got an overall view of what is going on? Perhaps Yamakawa could answer that. I am in no position to determine that, but for his ties to NASA. I do think McNutt must know, she's entrenched, up to her eyeballs in it and I do not believe, given her position and how long it took her to get there, plus her past actual crimes, other than not speaking out, but the BP oil spill, Keystone, etc. make it clear that cat will not change her spots. God knows what she tells her children and grandchildren. It would appear certain that she doesn't discuss the evils of fossil fuels with them! I love your: " If I were God for a day..."!!!! And your comment the other day on the MIT paper from late 60s-"Did no one read it!" Uh, I never heard of it, was in university, protesting Viet Nam, and dropping acid!! You were what? In Junior High?!! Good God woman, reading this MIT paper!? I love your mix of humor with scathing remarks and tons of obscure info. And I take it your wrist is better-given playing for the last outdoor wedding of the season while baking? It seems where you live is often warmer than here, just across the pond. I too love Point Reyes and surrounding areas and was involved over there with birds until crippled. I am always a bit surprised when you are hopeful, such as about Hansen and even McNutt. Myself, I am no longer hopeful. And so easily pleased to see Anything happen to open that door to make room for the elephant which demands attention. I begin to wonder why I even try. By the way, during my last sleepless night, I realized why. Which is that there was one train after another for hours and hours, horns blaring And a helicopter escort! WTH?!!!

o  Yamakawa says:

[October 7, 2016 at 3:45 am](#)

@Rachel, Dr.Hansen's outside expertise is meant as an irony...You can easily check by looking at his proud CV. Even if regarding by extreme benevolence and forgiveness, of the possibility of compartmentalization in NASA and the likes. It is

less likely for a person in that position to not see the data, of the dire influences to the climate, from stuff other than CO2. You can see that by googling his websites and his papers by the keyword, “aerosols”. My understanding is that he had done, is doing “intentional misleading”, “intended shortcomings”.

I don't like criticizing or impeaching people, but that does not equal to of being too naive. I have written “logical reasoning” above, so I will write **an “emotional” description** here. My intent is not targeted specifically to Dr.Hansen, but pointing as a representative figure, an easily discernible example, in the hordes of similar misleading academics. There are more better actors out there, more difficult to discern.

Dr. Pushker A. Kharecha is a staff of Dr.Hansen's group. See the video below, and observe his eyes and his uncalm gestures. You can skip “academic reasoning” and look thru a person's eyes to see the “soul” of a person. Person living one's life in dishonesty to oneself as well as to others, aware of one's insincerity. Very illogical way to discern, but there are **no “academic smoke screens”** to fool you.

I am personally aware that, the more difficult part comes after halting the geoengineering. The more deeper being aware of the psychology of the crimes, the deeper the forgiveness from benevolence is possible.

In 1972 I was entering my sophomore year in high school. I was identified a "more able learner" in third grade and sat through the occasional enrichment class with poor Mr. Van, a largely clueless guy who droned on about Interesting Stuff during which time we all had to sit politely and say smart things when necessary... but I got a lot more from my (formerly Canadian) neighbors who are quite the intellectuals and their daughter and I share the exact same birth date. We often discussed Peak Oil and the Limits to Growth made a huge splash that year– the oil companies were reeeeaally pissed off about it and then the Arabs did the embargo thing in 1973. I was on the Fast Track to The System and would have entered Stanford in 1975 but for the fact that their top violin teacher never returned my letters to him for setting up an audition date, also a full CA state scholarship would not cover the tuition. In those years you only got the Full Treatment for help if you happened to be not the color that I am (yes, racism comes in every color– *DAMMIT!!!*). Down on The Farm these days now they pay for everyone who is earning less than \$100k per year, no matter the color. Class and money is at least as big a problem, if not bigger, than race– "What if the schools had all the money they needed and the *AIR FORCE* had to hold a *BAKE SALE* to buy a jet–??? And if **women were fully empowered**, we would most definitely be living on a different kind of planet–

US Patent RE29,142 – February 22, **1977** – **Combustible compositions for generating aerosols, particularly suitable for cloud modification and weather control and aerosolization process**

Abstract

A combustible composition for ***generating aerosols for the control***

and modification of weather conditions consisting of a readily oxidizable substance selected from the group consisting of **aluminum, magnesium, alkali-metals and alkaline earth metals**; an oxidizing agent selected from the groups consisting of: (a) sulphur and sulphur yielding compounds; and (b) organic and inorganic nitrates, alkali-metal and ammonium chlorates and perchlorates. ...

This invention relates to combustible compositions, consisting of or comprising: mixtures of one or more **easily oxidizable, powdered metals and one or more powdered oxidizing agents**, which mixtures are able to generate aerosols to be employed, in particular, to control and/or to modify weather, such as to clear fogs, **to modify clouds**, to prevent hail. ... This invention relates also to the process for the **aerosolization** of the reaction products of said compositions realized by oxidizing said metal/s with said oxidizing agents. This invention further relates to an aerosolization process of various substances which are contained in mixtures comprising one or more easily oxidizable, **powdered metals** and powdered oxidizing agents, the aerosolization being the consequence of the combustion of the above defined mixtures and/or of the melting or vaporization of suitable salts embodied in the mixtures. ... We have found that **aluminum is the most suitable metal** since, besides being relatively cheap, it may be considered inert at room temperature (this characteristic is an important factor for safety in the preparation and transportation of the described compositions), it yields remarkable heat of combustion which favours a good continuity of reaction and a good **aerosol dispersion**. ...The **metals**, as already indicated for aluminum, are used in their **finely divided, powdered form**.

The long lines of aerosol morphed and microwave manipulated fake clouds usually float over my area from the Pacific Ocean where the major spraying is conducted out of sight of my prying eyes. These sat pics, while not imaged over my area, helps with my understanding of the small piece of a puzzle being put into focus more with each passing day. Fake News and False Flags: Pentagon Paid Millions to Create Fake Terrorist Videos / How the Pentagon paid a British PR firm \$500 million for top secret Iraq propaganda / By Crofton Black and Abigail Fielding-Smith / Global Research, October 03, 2016
A controversial foreign PR firm known for representing unsavory characters was paid millions by the Pentagon to create fake terrorist videos. The Pentagon gave a controversial UK PR firm over half a billion dollars to run a top secret propaganda program in Iraq, the Bureau of Investigative Journalism can reveal. ... output included short TV segments made in the style of Arabic news networks and fake insurgent videos which could be used to track

the people who watched them, according to a former employee. The **agency's staff worked alongside high-ranking U.S. military officers** in their Baghdad Camp Victory headquarters as the insurgency raged outside. ... [the] firm had worked on a "covert" military operation "covered by various secrecy documents." ... reported to the Pentagon, the CIA and the National Security Council on its work in Iraq ... There were three types of media operations commonly used in Iraq at the time, said a military contractor ... "White is attributed, it says who produced it on the label," the contractor said. "Grey is unattributed **and black is falsely attributed**. These types of black ops ... were **a pretty standard part of the industry toolkit**." ... television commercials portraying al Qaeda in a negative light. ... news items which were made to look as if they had been "created by Arabic TV" ... send teams out to film low-definition video of al Qaeda bombings and then edit it like a piece of news footage. It would be voiced in Arabic and distributed to TV stations across the region ... American origins of the news items were sometimes kept hidden. Revelations in 2005 that PR contractor the Lincoln Group had helped the Pentagon place articles in Iraqi newspapers, sometimes presented as unbiased news, led to a Department of Defense investigation. The third and most sensitive program ... was **the production of fake al Qaeda propaganda films**. ... given precise instructions: "We need to make this style of video and we've got to use al Qaeda's footage," he was told. "We need it to be 10 minutes long, and it needs to be in this file format, and we need to **encode it** in this manner." US marines would take the CDs on patrol and drop them in the chaos ...

I feel exactly the same Brian. Along with all the other problems in the world, I fear for the future of my 3 little grandchildren in this toxic H*ll hole we are leaving them.

I videoed some of these big planes recently on full zoom to try and see any markings, without any success. I suspect they are unmarked. I would really like to know where they are taking off from. Such activity would surely be noticeable at UK airports, even at military airports, yet I find it difficult to believe they come and go all the way from the US. I also wonder if they show up on these real-time images supposedly showing progress of all flights of planes currently in air-space, I think with flight numbers indicated to help with that.

Seeing these images provided by Dane also makes me wonder why they never show up on all the so-called images of earth from ISS, etc. As a flat earth believer (I used to ridicule the notion until I started looking into all the evidence) I realised that all pictures of earth, supposedly from space, are composite, computer-generated images (GCI's) and NASA admit to that. Their cloud formations all look suspiciously natural with no trails shown. Best wishes with your efforts. I also try to get the warnings into MSM whenever I can as I see others are now doing.
